Subject: IMPORTANT! SIEF agreement and Status of REACH dossier for 1-chloro-2,3-epoxypropane (ECnr. 203-439-8)

To: all 'active' members of the SIEF for Epichlorohydrin (1-chloro-2,3-epoxypropane, ECnr. 203-439-8) and all Leading, Involved and Passive SIEF members who declared their status

cc: REACHCentrum

THIS INFORMATION IS IMPORTANT INFORMATION FOR COMPANIES INTENDING TO FILE A REGISTRATION DOSSIER FOR EPICHLOROHYDRIN IN 2010.

IF YOU DO NOT INTEND TO REGISTER, YOU CAN DISREGARD THIS MESSAGE.

IMPORTANT Information on Epichlorohydrin dossier creation status and data sharing (SIEF agreement, LoA)

Dear Epichlorohydrin SIEF members,

many of you may already be waiting for SIEF communications from the Lead Registrant for Epichlorohydrin. On behalf of the SIEF leadership team (i.e. the Allylics consortium) I would like to inform you about the current status of work and some important steps and activities YOU will have to take if you intend to submit a dossier.

1) Status of work

Dow is still working on the creation of the IUCLID 5 file. It is our current plan to submit the Lead Dossier in July 2010 or earlier if possible. This will allow all co-registrants sufficient time to prepare and submit their dossiers before the submission deadline November 30th, 2010.

We will create a full dossier including monomer use. We intend to include a **Chemical Safety Report (CSR)** for the identified uses. The submission will of course also cover Epichlorohydrin as 'transported isolated intermediate'.

IMPORTANT for all registrants!

Our dossier and CSR will only cover uses that take place under Strictly Controlled Conditions (SCC) to avoid the need for Authorization of any use. **All uses for which SCC cannot be confirmed will NOT BE SUPPORTED! It is the duty of the manufacturers/importers/users to confirm SCC.** Any registrant that cannot confirm SCC throughout his supply chain will need to request from ECHA an individual authorization of uses.

2) Data sharing / SIEF agreement

We have prepared the data sharing regime based on the CEFIC SIEF agreement template to meet the needs for Epichlorohydrin. **Every company that wants to buy a Letter of Access (LoA) will need to sign a SIEF agreement first.** The SIEF agreement will be available from the Allylics consortium website at REACHcentrum as of **March 1st, 2010**. The Allylics consortium manager of REACHcentrum will manage the SIEF agreements and the LoAs.

The Allylics consortium website can be accessed via the attached link to **pick up the SIEF agreement and further important information as of March 1st, 2010:**

<http://www.reachcentrum.eu/EN/consortium-management/consortia-under-reach/allylics-reach-consortium.aspx>

Please also consult SIEFreach (www.siefreach.com) and REACH-IT for '1-chloro-2,3-epoxypropane' for actual and previous SIEF communications. Thank you.

For the Allylics Consortium,

Dr. Roland Wickenkamp
